RESULTS:

Count the number of symbols you have selected the most and find below your "Chocolate Eater" Diagnosis!

☐: You are a distinguished chocaholic! You like chocolate for the gustative pleasures. There is an intellectual love that links you to the chocolate. Like everything around you, your chocolate must be a good quality product. It has to be dark of course! No place for the milk or white chocolate! That would be a sacrilege!

♣: You are a regressive chocaholic! Your chocolate makes you remember your childhood and sweetness. You prefer it a little bit sweet or with honey. For you the chocolate is a step back in time from the adult world!

△: You are the athletic one in this test! For you, the chocolate is a food that can procure you enough energy and vitamins for your metabolism. Try to learn how to appreciate its flavors, they are not too bad!

●: You are the perfect example for a neurotic chocaholic! The chocolate is your favourite drug! You abuse it impulsively and eat it when you feel alone. Chocolates are not a medication and even if it was known for stimulating some kind of power, you can't live off it forever!
